H. IIZUKA and S. MINEKI: Studies on the genus *Monascus*. II. Substrate specificity of two glucoamylases obtained from *Monascus kaoliang* F-1 185

Short Communication

I. UNO and T. ISHIKAWA: Effect of cyclic AMP on glycogen synthetase in *Coprinus macrorhizus* 193

Number 4, August 1978

S. IKEMOTO, H. KURAISHI, K. KOMAGATA, R. AZUMA, T. SUTO, and H. MUROOKA: Cellular fatty acid composition in *Pseudomonas* species 199

M. FUKUNAGA, T. MORITA, and I. MIFUCHI: Loss and retention of mitochondrial drug resistance in *rho*$^-$-mutants of yeast induced by 4-nitroquinoline 1-oxide and ethidium bromide 215

S. OGATA, F. KATO, M. MIYANAGA, S. HAYASHIDA, and M. HONGO: Purification and some properties of an inducible bacteriocin, clostocin O, of *Clostridium saccharoperbutylacetonicum* 223

Y. KATOH, A. KUNINAKA, H. YOSHINO, A. TAKATSUKI, M. YAMASAKI, and G. TAMURA: Scanning electron microscopy of giant cells of *Penicillium citrinum* 233

J. IKEDA, F. KAWAMURA, H. SAITO, and Y. IKEDA: RNA polymerase in vegetative cells of *Bacillus subtilis*. III. Accumulation of RPase L2 after rifampicin treatment introduced at a sublethal concentration 241

Short Communication

J.-S. LAI, S. OKUDA, and H. TAKAHASHI: Stimulative effect of bovine serum albumin on the transport activity of serine in membrane vesicles from *Escherichia coli* 251

Number 5, October 1978

R. J. METHA: Effect of exogenous organic compounds on growth of the obligate methylotroph 255

E. C. K. IGWEGBE and C. THOMAS: Occurrence of enzymes of arginine dihydrolase pathway in *Spiroplasma citri* 261

M. H. AHMAD: Influence of nitrogen on growth, free amino acids and nitrogenase activity in *Spirillum lipoferum* 271

K. IMAI: Tricarboxylic acid transport systems in *Proteus mirabilis* 279

Short Communications

K. ABE, E. TSUCHIYA, S. FUKUI, N. KODAMA, and A. KUSANAGI: Method for isolation of mating-less mutants from *Rhodosporidium toruloides* M 1057, a strain of mating type *a*.. 287

E. TSUCHIYA, K. ABE, and S. FUKUI: Sequence of events in early stages of sexual differentiation caused by rhodotorucine *A*, a fungal sex hormone: biological determination using matingless mutants derived from *Rhodosporidium toruloides* M 1057 291

K. E. SCOTT and R. SNOW: A rapid method for making glass micromanipulator needles for use with microbial cells 295

Number 6, December 1978

H. TAKAHASHI, H. SAITO, and Y. IKEDA: Viable T4 bacteriophage containing cytosine-substituted DNA (T4dc phage). I. Behavior towards the restriction-modification systems of *Escherichia coli* and derivation of a new T4 phage strain (T4dc) having the complete T4 genome 297

M. YAMADA, M. MATSUHASHI, and M. TORII: Effect of novobiocin and ethylenediaminetetraacetate on formation of cell packets in *Micrococcus luteus* 307
A. UEKI, E. MIYAGAWA, H. MINATO, R. AZUMA, and T. SUTO: Enumeration and isolation of anaerobic bacteria in sewage digestor fluids 317
K. YANO and H. NISHIE: Superoxide dismutase in facultatively anaerobic bacteria: Enzyme levels in relation to growth conditions 333
E. MIYAGAWA, R. AZUMA, and T. SUTO: Distribution of sphingolipids in *Bacteroides* species 341

Short Communications

S. SHINOMIYA and Y. SAKAKI: Artificial control of the initiation of late-type replication of bacteriophage λ using temperature-sensitive *RecBC* DNase 349
S. SHINOMIYA and Y. SAKAKI: Role of *gam* protein and *RecBC* DNase in the growth of bacteriophage λ on *polyA*$^-$ hosts 355
